ABOUT

Hello! I am passionate about crafting exceptional digital experiences and solutions that thrive on the internet. My interest in web development took place in 2020 when I enrolled in the Higher Professional Technical Course in Development for Web and Mobile Devices. I was pleasantly surprised to discover that there was more to web development than just PHP, MySQL, and Bootstrap!

Currently, I am pursuing a degree in Computer Science and Engineering and have aspirations to continue my education with a Master's degree in Computer Engineering. While I am dedicated to my studies, I also value the importance of hands-on experience and continuously work on personal projects to enhance my abilities.

While I am dedicated to my studies, I also value the importance of hands-on experience and continuously work on personal projects to enhance my abilities.
